About the job

About the Role
We are looking for a Senior AI / Backend Engineer to design and build the core systems
behind our AI-driven product. This is not a traditional machine learning role. The focus is on
LLM-based agents, orchestration, and strong backend architecture, with an emphasis on
production-grade engineering.
You will work on building reliable, scalable systems that combine LLMs, tools, workflows, and
data, while following strong software engineering and CI/CD practices.

What You'll Do
- Design and implement LLM-based agent systems, including reasoning workflows, tool
- use, and orchestration
- Build and maintain backend services and APIs using modern engineering practices
- Own backend architecture decisions with a focus on scalability, reliability, and
